Frontend Developer

Frontend Developer with over 2 years of experience crafting engaging and high-performance user interfaces. Proficient in HTML, CSS, and JavaScript, with hands-on expertise in modern frameworks such as React and Next.js. Experienced in backend technologies including Node.js, Express, MongoDB, and PostgreSQL. Adept at optimizing web application performance and enhancing user experience through innovative solutions. Passionate about creating intuitive, user-centered designs and staying updated with the latest industry trends.

Professional Experience

Medical Appointment App, Colombia

Jun 2024 - Present

FRONT END DEVELOPER

- Fullstack application developed to schedule, reschedule and cancel medical appointments, in which patients can register, through a form designed in detail to collect patient information, as well as the doctor they want to see them.
- The application is developed on Appwrite, which allows us to implement databases, storage, authentication and messaging to our application.
- Platform administrators can modify the available appointments and any modification will be informed to the patient via text message, using Twilio.

Twitter Clone App, Colombia

Jul 2024 - Jul 2024

FRONT END DEVELOPER

- Fullstack application developed on the front with React, TailwindCss, React Query, React hot toast, react router dom and DaisyUI, and the back was developed with NodeJs, Express, MongoDB, mongoose, jsonwebtoken, cloudinary and bcryptJs.
- An important feature to highlight is the protection of routes both in the backend and in the front. For the backend, a middleware was implemented that verifies through JWT if a token exists to allow the user access to the different endpoints of the server.
- The Users, Posts, and Authentication models were implemented using MongoDB with the help of Mongoose to structure, organize, and validate the information.

Education

Soy Henry, Bogotá, Colombia, Fullstack Developer in Web Development, Jan 2022 - Nov 2022

Platzi, Bogotá, Frontend Architect in Web Development

Pamplona University, Pamplona, Colombia, Telecommunications Engineer

Core Competencies

Programming Languages HTML, CSS, JavaScript, TypeScript

Frameworks and Libraries React, TailwindCSS, ThreeJs, Next.js, Nodejs, Express, MongoDB, PostgreSQL, Zustand, React Redux

Development Tools Webpack, NPM, Vite

Tests Jest

Version Control Systems Git, GitHub

Languages English, Spanish
